

FREE BEGINNER GUIDE

Affiliate Starter Roadmap PH

A simple roadmap for starting with more clarity - not more overwhelm.

Inside this free roadmap

- What to focus on after affiliate registration
- Product + content basics you can actually apply
- The few numbers worth tracking as a beginner
- Which resource fits your next step: Shopee, TikTok, Lazada or Planner

Your simple 5-step affiliate roadmap

You do not need to master everything before posting. Use this as a loop: choose a focus, test content, review what happened, then improve.

1

Choose one platform first

Pick Shopee, TikTok Shop or Lazada as your main focus. Starting with one platform makes it easier to learn what works before spreading your attention too thin.

2

Research a small product list

Do not choose products based on commission alone. Look for buyer demand, good value, seller/review trust, proof you can show, and enough content angles.

3

Create useful content

Start with one buyer problem or question per post. Use a clear hook, show the product honestly, demonstrate proof when possible, then give one simple next step.

4

Track what happens

Views tell you attention. Clicks tell you interest. Orders tell you whether the product/listing/value closed the sale. Track enough to make decisions.

5

Repeat what works

A weak post is still data. Test a different hook, angle, buyer problem, demo or product. Improvement usually comes from iteration, not one perfect post.

Beginner rule:

Do not wait until you understand every feature, rule or strategy. Platform requirements can change, so always check the latest instructions inside the app - then use this roadmap to decide what to work on next.

Before you film, answer these two questions

1. Is this product worth testing?

- ✓ Does it solve a clear buyer problem?
- ✓ Is the price/value reasonable?
- ✓ Are seller ratings/reviews trustworthy?
- ✓ Can I show real proof or a useful demo?
- ✓ Can I create more than one content angle?

2. What will this ONE post say?

- ✓ One specific buyer problem
- ✓ One angle: demo, review, FAQ, POV, etc.
- ✓ One 1-3 second hook
- ✓ One proof point or real-use clip
- ✓ One low-pressure CTA

A simple short-form structure

HOOK

Stop the scroll

PROBLEM

Make it relevant

PROOF

Show, don't just claim

CTA

Give one next step

One product can become many posts.

Try different angles before deciding you need a new product: problem/solution, demo, honest review, comparison, FAQ, use case, buyer mistakes, routine, price/value or objection handling.

TIP: New angle ≠ new product.

You do not need a complicated analytics system

As a beginner, track the numbers that help you decide what to change next. The goal is not to collect data - it is to learn from it.

VIEWS

Did the content earn attention?

Check: Hook / topic

CLICKS

Did they want to know more?

Check: Buyer fit / demo / CTA

ORDERS

Did the product + listing close?

Check: Value / listing / trust

COMMISSION

Was the result worth repeating?

Check: Scale / repeat / refine

If a post underperforms, review the controllable parts first:

Hook

Was the first 1-3 seconds specific enough to stop the right buyer?

Buyer angle

Was the message meant for a clear person/problem?

Proof / demo

Did you show enough for the viewer to believe or understand the product?

CTA / listing

Was there a clear next step, and did the product page match expectations?

Remember:

A post with no sale is not automatically useless. It may still tell you which hook, angle, product or buyer question to test next.

YOUR NEXT STEP

Choose the resource that matches your current problem

You do not need to buy everything. Start with the area where you want the clearest roadmap or system.

SHOPEE

Shopee Affiliate PH Playbook

Best if you want a Shopee-specific roadmap for product selection, content, conversion, tracking, growth/compliance and a 30-day action plan.

TIKTOK SHOP

TikTok Shop Affiliate PH Playbook

Best if you want to improve product selection, shoppable video strategy, conversion-focused content, tracking and growth on TikTok Shop.

LAZADA

Lazada Affiliate PH Playbook

Best if you want a beginner-friendly Lazada roadmap from product research and traffic/content to tracking, growth and a 30-day action plan.

PLAN + TRACK

Affiliate Content Planner & Dashboard

Best if your main problem is execution: ideas, hooks, scripts, clips to shoot, posting status, views, clicks, orders and commissions in one reusable file.

KEEP IT SIMPLE

Your first goal is not to know everything. It is to start learning on purpose.

Pick one platform. Choose a few products. Create useful content. Track what happens. Then improve one thing at a time.

Your next 7 days

- 1 Choose ONE main platform to focus on.
- 2 Shortlist 5-10 products worth testing.
- 3 Pick 3 content angles for your first product.
- 4 Film and post without waiting for perfect.
- 5 Track views → clicks → orders.
- 6 Repeat or improve based on what you learn.
